

Mariam Ben Hassen

Junior Full Stack Developer

mariam.benhassen@ensi-uma.tn — +216-55-054-412 — LinkedIn — GitHub — Portfolio

Summary

Motivated Junior Full Stack Developer experienced in MERN, Next.js, TypeScript and real-world projects. Built responsive UIs, RESTful APIs, authentication flows, real-time features and CI/CD setups. Ready to bring clean, scalable solutions to a collaborative team.

Technical Skills

- **Frontend:** React.js , Next.js, React Native , Redux Toolkit, Tailwind CSS, TypeScript , JavaScript (ES6+)
- **Backend:** Node.js , Express.js ,RESTful API Design, JWT Authentication , Prisma ORM
- **Databases:** MongoDB, PostgreSQL (Neon, Supabase), Firebase
- **DevOps & AI:** Docker, Git, Vercel, CI/CD, Inngest, LLM Integration

Professional Experience

Software Engineer Intern

Mat-it Agency — Feb 2025 – Aug 2025

Technologies: Next.js, TypeScript, Node.js, MongoDB, Docker, GitLab CI/CD

- Designed and implemented AI-powered document processing features (PDF → dynamic web content), building and optimizing backend endpoints and LLM pipelines
- Refactored legacy modules and resolved critical production issues, improving system reliability and deployment workflows

Software Developer Intern

Delta Web IT — Jun 2024 – Aug 2024

Technologies: React Native, TypeScript, Redux Toolkit, Firebase, Node.js

- Developed and deployed a cross-platform mobile application serving 500+ users with real-time messaging and push notifications
- Modernized backend and frontend architecture, improving data consistency and application stability

Web Developer Intern

Via Web IT — Jun 2023 – Jul 2023

Technologies: React, Node.js, MongoDB

- Built a full-stack e-commerce platform with REST APIs, dynamic cart system, and chatbot integration

Projects

Project Management PlatformMulti-tenant SaaS for team collaboration

- Architected a multi-workspace system with role-based access control, projects, tasks, and real-time analytics dashboard
- Implemented secure authentication and organization management (Clerk) with event-driven background jobs (Inngest)
- Designed scalable PostgreSQL schema (Prisma + Neon) and built a type-safe full-stack architecture with Next.js and TypeScript

Savvy Drop – Automated Price Tracking System

- Built automated daily scraping pipeline with scheduled jobs storing historical price data in PostgreSQL with row-level security
- Designed a real-time price trend dashboard using Recharts with transactional email alerts and a responsive, secure user interface.

Education

Engineering Degree in Computer Science – ENSI (2022–2025)

Preparatory Program in Math & Physics – ESSTHS (2020–2022)

Certifications & Languages

Certifications:

Prompt Engineering (KodeKloud)
Docker Fundamentals (KodeKloud)
HCIA-AI (Huawei)

Languages:

Arabic (Native)
English (Fluent)
French (Professional proficiency)
German (Basic)
